NATIVE PLANTS

Kong Jr. Rose Coleus

Solenostemon scutellarioides 'Kong Jr. Rose'

Height: 24 inches

Spread: 30 inches

Spacing: 24 inches

Sunlight: ● ●

Hardiness Zone: 9b

Other Names: Kong Junior Rose

Group/Class: Kong Series

Ornamental Features

Kong Jr. Rose Coleus' attractive small serrated pointy leaves remain lime green in color with showy rose variegation and tinges of dark red throughout the year. Neither the flowers nor the fruit are ornamentally significant.

Landscape Attributes

Kong Jr. Rose Coleus is an herbaceous evergreen perennial with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant. The flowers of this plant may actually detract from its ornamental features, so they can be removed as they appear. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Kong Jr. Rose Coleus is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Kong Jr. Rose Coleus will grow to be about 24 inches tall at maturity, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years.

BUCHANAN'S

NATIVE PLANTS

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil pH, but grows best in rich soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Kong Jr. Rose Coleus is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
